

NEWFOUNDLAND CLUB OF AMERICA

Breeder's Corner

AKC Educated Breeder Webinars

Wednesday, November 13, 2024 7:00 pm (EST) – Dr. Brandon Sinn, DVM

"Hip Score Report: Understanding Hip Radiographs"
Dr. Brandon Sinn will share information on completing hip X-ray evaluations on your breeding stock. Join him to learn tools to evaluate results and improve your decisions for your breeding program.

Wednesday, December 4, 2024 6:00 pm (EST) – Dr. Claire Wiley, VMD, DACVIM

"DNA Testing and Breeding Decisions"
Join us for a complimentary webinar with Dr. Claire Wiley that will provide insight on applying DNA test

results to your breeding decisions. As we near the end of the year, it is a great time to analyze health information acquired through DNA testing as you plan your breedings for 2025.

FREE WEBINAR

Breeding Healthy, Quality Dogs: The Veterinarian, Breeder, and Public Roles

Wednesday, October 23, 2024 | 12:00 p.m. EST (UTC/GMT -4hrs)

Jerold S Bell, DVM

Adjunct Professor of Genetics
Department of Clinical Sciences
Cummings School of Veterinary Medicine
Tufts University, USA
Chairman, Hereditary Disease Committee
World Small Animal Veterinary Association

The purposeful breeding of dogs occurs globally in pedigreed and mixed-breed settings.

What are reasonable and responsible guidelines to produce healthy dogs and healthy breeds? How should our knowledge of dog populations and gene dynamics influence how breeding dogs are selected and the selection of their mates? What are the roles of various stakeholders, including breeders, kennel clubs & breeding societies, veterinarians, legislative & governing bodies, and the public?

This free, interactive webinar will highlight useful tools and outline logical steps and corresponding roles regarding breeding quality, healthy dogs.

All participants will have the opportunity to take part in live polls and a Question & Answer session with Dr. Bell during this 90-minute event.

Bridging the Gap Between the Art and Science of Dog Breeding

Host Laura Reeves is joined by Aimee Llewellyn Zaidi, project manager for the International Partnership for Dogs. Llewellyn Zaidi's work is bridging the gap between art and science in dog breeding. They talk about inbreeding and genetic diversity, how those things go together and what you can do when there isn't a test for a health problem.

Puppy Culture Bundle

As beautiful as it is functional, this bundle not only covers all the bases, it looks great while doing it. All the guidance you need to raise a Puppy

Studies Needing Participants

Heart Disease in Newfoundland Dogs

Culture litter, plus charts, ideas, shopping lists, and worksheets to record your experiences. You'll be amazed with this one. A companion to the original Puppy Culture film, this Workbook ties it all together!

The Puppy Culture team of experts have bred, raised, and trained thousands of dogs, and they know from first hand experience what works best. They make that vast experience available to you, broken down into clear instructions, in short chapters that are easy and fun to watch.

[Buy The Book](#)

Led by **Dr. Vilma Yuzbasiyan-Gurkan**, Professor, Microbiology and Molecular Genetics and Small Animal Clinical Sciences and the project's Principal Investigator, the study will employ advanced genetic tools to discover genetic determinants of SAS in Newfoundland dogs. If successful, findings could be used to genetically screen dogs for this disease and inform breeding decisions.

Affected Puppies and Both Parents
blood samples needed!
