Mentoring Matters

*Are you an experienced Newf owner
passionate about the Breed?*

Have you considered becoming involved in breeding Newfs, but want more information and education about what is involved? Would you like to connect with an NCA Breeder Mentor to get this information and mentoring on breeding?

The NCA Breeders Education Committee wants to help you do this! You do not need to be an NCA member to request information or mentoring. If you are attending the upcoming National Specialty, please look for breeder mentors - they'll have yellow Breeder Education stickers on their name tag, and they'll be happy to talk to you!

Please send me information about Mentoring

Continuing Education

Embark Canine Health Summit -- April 27 & 28

Discover the latest insights, best practices, and knowledge from leading experts in the fields of genetics, veterinary medicine, and dog breeding via panel discussions and dynamic presentations. The Embark Canine Health Summit's mission is to engage leaders from across the canine community to join in providing an educational and informative platform to:

- Bridge the gap between canine genetics research and purpose-bred dog breeding

- Elevate collaboration between breeders, veterinarians, canine behaviorists, genetics experts, and scientists who are all on the same journey to improve the health and lifespan of dogs

Nutrition Recommendations in Breeding Dogs -- Podcast

Dr. Marty Greer and Sheryl Bradbury, owned brands manager at Revival Animal Health, join Host Laura Reeves for a discussion about micronutrients and supplements for breeding dogs.

"One of the concepts that we need to discuss is that there's a likelihood that some of the commercial diets are not as nutritionally complete as they need to be for all stages of the dog's life and that includes reproduction," Greer said.

Breeder Education Seminar

A Glimpse at STRUCTURE IN ACTION

A special workshop presented by

PAT HASTINGS

Pat Hastings is well respected in the dog-world as an educator, author and AKC judge. Well known for her Puppy Puzzle DVD, she evaluates the structural quality of over 250 litters per year. Based on her popular STRUCTURE IN ACTION seminar, this is a glimpse of what it takes to have the very best dog possible for whatever you would like to do with it. This is a journey into

structure and the pertinence to action. Anyone who owns and works with dogs needs to consider the dogs' structure when examining the job of the dog. It does not matter if it is going to spend its life on your couch, be in your breeding program, in the show ring, weaving poles, pulling a cart, it needs to be the best it can be.

AGENDA:

- *The basics of canine structure
- *What leads to damage and injuries in your dog
- *How to read and listen to your dog

There is still time to RSVP if you would like to attend. Please [let us know](#) if you can join us for the FREE seminar.

Quick Quiz - Answer in the Next Issue

Prior to going into labor, what can you expect to see in a bitch's temperature

Temperature rise

CHIC Dogs

The NCA Health and Longevity Committee will be saluting all of the CHIC Newfoundland's at this year's

National Specialty. Be sure to check out the display of over 1000 CHIC Newfs!

Canine Reproduction and Whelping

A Dog Breeder's Guide

• Reproduction Problems • Removal of Dewclaws
• C-Section • Whelping Advice
• Artificial Insemination • Diet • Progesterone Levels

Myra Savant Harris R.N.

Recommended Reading

Canine Reproduction and Whelping brings together information that will be invaluable to today's dog breeders because it helps to fill in the gaps in knowledge of even the most experienced breeder. Learn how facts about human reproduction, conception and birth get unknowingly mixed up with the very different canine side of things. Then learn how to use this information to have more successful breedings and healthier pups. Author Myra Harris combines her years of experience as a labor and delivery nurse with her passion for breeding dogs to give you practical and unusual information.
